CHOICE IRISES

GROWN AT

Sunnyside Gardens

NATICK, MASS.

TELEPHONE 1559-J

SUNNYSIDE GARDENS

Are located on both sides of Harvard Street Extension, and No. 3 Sawin Street (residence). Take North Avenue, at North Main Street, and turn left into Sawin Street. Visitors are welcome any day in the week. I grow more than 500 varieties of the best modern kinds, including a great many of the recent novelties of merit, and several thousand seedlings of my own raising.

IMPORTANT—Make Post Office orders and

checks payable to SUNNYSIDE GARDENS.

POSTAGE

Postage will be paid on all orders amounting to \$2.00 or more. Orders for less than \$1.00 are not accepted. 10% discount allowed on orders amounting to \$25 or more, except varieties priced Net. We begin shipping the middle of July and up to the first of September. To Southern States and the West Coast until late October.

SUBSTITUTES

Late orders should include a list of substitutes in case some varieties are sold out. Otherwise your money will be returned for varieties out of stock.

SHIPPING

None but fully matured and blooming-size roots, properly dried out before packing, are sent out. Fresh dug roots, packed too soon after digging, are liable to sweat in transit, if the weather is hot, especially if they are packed in a tightly-closed box with no ventilation. The rhizome then becomes soft, followed by rot, soon after planting. (Holes are always punched in the box to give free circulation of air). Always examine the rhizomes soon as received, and if they are not firm and hard return at once to the dealer you purchased them from.

JOIN THE AMERICAN IRIS SOCIETY

You will receive four Bulletins each year, chock full of Iris interest, all for \$3.00. Send your remittance to B. Y. Morrison, 821 Washington Loan and Trust Co. Building, Washington, D. C.

DYKES MEMORIAL MEDAL

The judges of the American Iris Society awarded the Dykes Memorial Medal to L. Merton Gage, for his Iris, Rosy Wings, as the most meritorious American Iris of 1939. This medal is presented by the Iris Society (British), yearly.

BRONZE MEDAL

The Bronze Medal of the Massachusetts Horticultural Society was presented to L. Merton Gage, for his Sunnyside Gardens Collection of Irises, in Boston, June 8th, 1932.

CULTURAL DIRECTIONS

Tall bearded Iris should never be planted in a location where water settles, and the melting snows of late winter form a coating of ice over the beds. If your garden is in a low place, build up the beds six or eight inches, and be sure that the drainage is adequate to allow water to go down through the soil freely.

Do not plant too deep, but so that the rhizome is just below the surface. Spread out the roots and water the hole. Then draw the earth around the rhizome and firm well, and do not water again

unless there is a continued dry spell.

If the soil is heavy and drainage is poor, white (coal) ashes will lighten it, and the clinkers may be placed in the bottom of the bed, about 18 inches down for drainage. Do not use the red ashes if white are obtainable. There is a lime element in the white ashes that is absent in the red, and this seems to be just the right chemical compound that is beneficial to many plants, Irises in particular. Use freely. Well-rotted manure may be safely used, if it does not come in contact with the rhizomes.

There is no fixed rule as to how often Irises should be divided. Varieties that increase rapidly should be divided and reset every third year, some perhaps every second year, but Irises that increase slowly will sometimes do well for five years with-

out being disturbed.

Irises do not bloom well in too shady a location, as they require plenty of sunshine. A southern exposure is best, and do not plant them on the north or west side of a building. When replanting an old bed add a good portion of fresh soil taken from some place in the garden where irises have not grown before. Late planted irises sometimes do not have time to grow good anchorage roots to protect them against spring heaving caused by

alternate thawing and freezing, and it is advisable to mound up these plants at the time of planting as is done by hilling up potatoes, or, at least, before the ground freezes. Mulching or covering with boxes is also a good way to give them protection against heaving, but if boxes are used, put a stone or brick under one side to give them ventilation.

BORERS AND ROOT ROT

Borers and root rot seem to be the important things that one has to contend with. I find that eternal vigilance will keep them both in check. Watch the foliage, beginning the first of July, or earlier in some sections, and where you see a leaf that looks slimy or the edges notched, look out for borers, and get an old glove and squeeze the leaf up and down between thumb and finger.

To check root rot, cut out rotted part and rub

wound with Calogreen.

If you raise seeds of Iris, you will know that the flowers have to be bagged soon after pollinating, to prevent the verbena fly from stinging their eggs into the new-forming seed pod, where they hatch out little larvae (Maggots), that eat up all of the young seeds. The scars on the pods where they have been stung are plainly discernible, when fully developed, and if scraped with a sharp pen knife and a little Calogreen rubbed into the wound, that will be the finish of Mr. Maggot. It is said that Calogreen is also effective for preventing rot, but for treating seed pods I believe ordinary calomel would be just as effective. This treatment does away with bagging.

TALL BEARDED IRIS

Sunnyside Gardens' Introductions

FOR 1940

- ARETHUSA (a nymph, in Greek mythology)—(Gage, 1940), parentage lost. A Daphne Red self with very large flowers of nice form. Golden bronze haft with inconspicuous bronze beard. Fair substance, and excellent branching on 42-inch stalks. Midseason. H. M., A. I. S., 1937, \$25.00
- CANALETTO—(A Venecian painter). (Gage, 1940), (Ashtoreth × Gloriole). The standards are a blend of Mauve and Gray. Falls are Hyssop Violet. The haft soft yellow with light brown reticulations. Straight hanging falls and orange beard. Early to midseason; 33-inch, \$5.00
- chestnut Hill—(Gage, 1940). (Cream colored seedling × Spartacus). A deep yellow self; the largest yellow Iris I have seen. There are four monster flowers of splendid form open at one time. Very heavy substance and excellent branching. Fragrant, and a good increaser; 45 inches tall; early to midseason\$10.00

- HAZEL GALLAGHER—(Gage, 1940), (Cristabel X Red Bonnet). There are seven color tones in this amazing blend, very hard to describe

accurately. The standards are Ageratum Violet to pale Vinaceous Lilac, with the haft a blend of gold and bronze. The falls at the haft are like the standards, blending to Dark Hyssop Violet to Petunia Violet to Pansy Violet, with a light brown border around the edges. The flowers are very large and of nice form with slightly flaring falls. Good branching; midseason; 36 inches tall\$10.00

- HYLEPHILA—(Gage, 1940). (A brown butterfly). Standards blending of Purplish Lilac, light yellow and brown. Falls Vinaceous Purple flushed brown with a wide brown border. A Lavender-Violet line extends from tip of orange beard through center of petals. Excellent substance, smooth texture. Free flowering and fragrant. Midseason, 36 inches tall. Large flowers..\$5.00
- TYRIAN BEAUTY—(Gage, 1940), (Lady Marion X Rosy Wings). A Vinaceous Purple self (light to reddish purple). Good-sized flowers of nice form, with very heavy substance and smooth finish. Greatly admired by all. Slightly fragrant; height 32 to 35 inches. Midseason. \$10.00

FROM E. G. LAPHAM

- BELLE COVERT—(Lapham-Gage, 1940), (Spring Maid × Lyndon). Standards Light Vinaceous Fawn Flushed Lilac. Falls Daphne Pink, gold medial line and edging; brown reticulation; heavy, deep yellow beard. Domed standards, well rounded; semi-flaring falls. Excellent substance and resistance. Three branches, ten blooms; tall stalks; vigorous grower and rapid increaser\$10.00
- ELIZABETH ANN—(Lapham-Gage, 1940). Pedigree on request. A blending of pink shades with cream color, resulting in a smooth self of definite real Pink effect. Strong and very well branched; up to 11 blooms. Tall, free flowering plant. Large blooms of good substance with domed standards and broad and well-rounded falls. On account of its vigorous and rapid increase we are able to offer it at the moderate price here listed, and this price will positively be maintained in 1941. Midseason to late. \$10.00

A Select List of Choice Irises INCLUDING

Recent Introductions

ALICE HARDING—(Cayeux). A soft yellow of
ALICE HARDING—(Cayeux). A soft yellow of Princess Beatrice form. A. M., A. I. S., 1937.75c
ALLUMEUSE—(Gage, 1938). This is the most
gorgeous colored iris I have ever selected from
my seed beds of many thousands. Its one fault
is poor branching, but its glittering and brilliant
color blending is so striking that this fault is
overlooked when one sees the beauty of the
flower itself. The standards are Wisteria Violet (bluish) yellow at the base. The falls are semi-
flaring, a blending of Pansy Violet (reddish)
and Raisin Purple (reddish) with a golden or-
ange beard. The substance is extra heavy with
velvety texture. Large flowers of excellent
form and free blooming. Strong grower and
medium increaser. Midseason. 45 inches. H.
M., A. I. S., 1938. Net\$5.00
AMIGO-(Wmsn., 1934). A very rich neglecta,
suggesting a blue-purple pansy. Light Lavender
Violet to Deep Hyacinth Violet. Narrow, white
margin. H. M., A. I. S., 1936\$1.50
APRICOT GLOW—(Wiesner, 1937). A flower of
soft Apricot tone. A profuse bloomer and prodi-
gious increaser. Em. 30-inch60c
BEOTIE—(Cayeux, 1932). An exceedingly lus-
trous flower of metallic elephant grey faintly
blended French blue. Blooms are large and finely formed. Ml. 36 inches
BEVERLY—(Gage-Lapham, 1939). A free flow- ering garden type, strong grower. Blooms of
good size with closed standards and broad, well
rounded flowers. Fair substance and resistance.
The color which is unusual and distinctive is
PURPLISH VINACEOUS, a decidedly pink ef-
fect of self-coloring edged and flushed with gold-
en brown. Heavy yellow beard, slight golded
reticulations. Styles light yellow, shaded Pur-
plish Vinaceous. Fair branching, mildly fra-
grant. 32 inches. Late. Net\$7.50
BLUE JUNE—(Donahue), (Gage, 1934). A blu-
ish lavender self. A Sensation seedling of Santa Barbara type; fragrant. H. M., A. I. S., 1933.
A. M., R. H. S., 193950c
BRUNHILDE—(Salb., 1934). Tall, dark blue vi-
olet self. H. M., A. I. S., 1936; A. M., 1937
\$1.00
CASENKA—(Storer, 1931). Enormous flowers
rich red-purple. 32 inches

cumpnia (A 1004) o hall mith
CHEERIO—(Ayres, 1934). S. dull gold with
CHEERIO—(Ayres, 1934). S. dull gold with bright red flush F. a glowing velvety red; 40
inches. A. M., A. I. S., 1938. A. M., R. H.
M., 1939
M., 1939
CHIEF SIDAR—(Gage, 1938). From the same
cross as ROSY WINGS, and similar to DAUNT-
LESS, one of its parents, but more rosy than
red, and much freer blooming. Introduced in
1938, and overlooked in making up my 1939
catalog. A very fine garden variety\$2.00
CHRISTABLL — (Lapham - Gage, 1936). Fine
shaped flowers with domed standards and flar-
ing falls. Fine branching and up to 9 large
blooms to the stalk. Heavy substance, and re-
sistant to heat and storms. S. Dark Vinaceous
(reddish) F. Acajou Red overlaid with Blackish
Purple. A brilliant red effect. A. M., 1938; H.
M A T C 1026 noting 01 40 inches \$2.50
M., A. I. S., 1936, rating 91. 40 inches \$3.50
COPPER PIECE—(Kellogg, 1936). This jaunty
iris of vivid coloring proudly carries copper
epaulets on each shoulder. Below the haft this
rich copper note blends to red and heliotrope
with a blaze of metallic blue near the center of
the fall. Standards are coppery red. H. M., A.
I. S., 1936. 34 inches\$3.00
CORALIE—(Ayres, 1932). Standards pale red,
Garded warren felle wine and milder board
flushed mauve; falls wine red; golden beard.
H. M., A. I. S., Dykes Medal, 193350c
CORONÉT—(D. Hall, 1938)—A soft, golden-tan
with a delicate underlay of rose-beige. Very
much of a golf A goodling of Ican Covery and
much of a self. A seedling of Jean Cayeux and
about the size of its parent. The blooms are
well rounded and of lustrous finish. Medium
stalk, nicely branched. 34 inches\$15.00
CREOLE BELLE—(Nich., 1934). Satiny Bishops'
Purple self with brown beard and wide band of
brown across the haft. 38 inches. H. M., A.
I. S
I. S
ards and falls rich crimson, the falls edged a
lighter tone. Strong and very well branched
stalk. Standards closed, broad and rather short.
Falls broad and well rounded, flaring. Moder-
ate yellow beard; heavy substance, mild fra-
ate yellow beard, neavy substance, find fra-
grance. Very slight reticulation. 5 inch blooms.
Midseason. 34 inches\$3.50
CRYSTAL BEAUTY—(J. Sass., 1935). A large,
pure white. 40 inches. H. M., A. I. S., 1936.50c
pare white, 40 menes, 11, 11., A. 1. S., 1990.000
DAMERINE—(An Indian chief), (Gage, 1939).
A large dark red self with wide domed stand-
ards and wide flaring falls. Splendid substance
and velvety texture; deep yellow beard. Very
fromant Height 26 inches Midsesson 6250
fragrant. Height 36 inches. Midseason. \$3.50
DESERET—(Thorup, 1936). S. clear rich yel-
low; F. a similar yellow brushed with clear, vel-
vety red. H. M., A. I. S., 1937. 40 inches75c
DONA SOL—(Cay., 1930). A bright rosy red
purple, a brilliant work of color50c
ECLADOR—(Cay., 1932). A large, ruffled pure
lemon yellow. Dykes Medal, 193275c
FPOS (Moad 1024) A houstiful nink toned
EROS—(Mead, 1934). A beautiful pink toned
Iris with soft gold at the throat. A. M., A. I. S., 1936. 38 inches50c

EXCLUSIVE—(Dr. Grant-Schreiner, 1937). A
clear light blue with distinct silvery sheen.
Large, clean-cut flowers of splendid substance.
40 inch. H. M., A. I. S., 1937. A. M., A. I. S.,
1939
Iris of most unusual and beautiful coloring. A
self of deep Pompeian Pink\$1.00
FRANK ADAMS—(Lapham-Gage, 1937). Very
strong, well branch stalks four feet tall. Extra
vigorous plant, tall, broad foliage. Large
blooms, good substance and good resistance.
Arched standards and fine shaped falls. Seven to nine blooms; mild fragrance. Standards
Maize Yellow. Falls Vinaceous Purple. H. M.,
1938. Net
1938. Net
overlaid with a glistening, frosty sheen. "The
flowers are exceedingly large, beautifully
formed with slightly flaring falls and per-
fectly domed standards, the heavy substance, fine finish and texture of the flowers enable them
to withstand wind, rain and heat. A wonderful
flower of brilliant sheen and great beauty. The
flower stalks are very tall and well branched,
bearing many blooms, which last over a long
period of time." H. M., A. I. S., 1933. A. M.,
A. I. S., 1935. Height 42 inches \$1.00

- JEAN CAYEUX—(Cayeux): Beautiful blending of havana or coffee brown, with golden glint.

 50c
- JELLOWAY—(Parker, 1936). One of the deeper toned of the newer yellows. An Iris of good size, lovely oval form, and excellent branching. ML. 42 inches. H. M., A. I. S., 1937.....\$3.50
- JERRY—(Lapham, 1934). This is one of the most brilliant red Irises that I have seen. 36 inches, 35c

- MARCO POLO—(Sch., 1936). A fine, clear toned red bicolor with lustrous standards of coppery rose and velvety crimson falls. M. 36 inches. H. M., A. I. S., 1937\$1.50
- MARQUITA—(Cay., 1931). A stunning novelty; very large flowers of creamy ivory whose falls are so thickly lined ruby red that the color appears solid to the ivory margin. C. M., France, 1931. A. M., A. I. S., 1936. 38 inches....60c
- MARY GEDDES—(Wash., 1931). Salmon; F. overlaid with Pompeian Red. 40 inches....30c
- MAUD DEMING—(Lapham-Gage, 1937). Strong, well branched 42-inch stalks. Seven to nine fresh, non-fading blooms. Standards Light Vinaceous Lilac (reddish). Falls, Schoenfeld's Purple (very reddish). Mild fragrance...\$2.00
- MISSOURI—(Grint., 1933). One of the exceptionally fine new Blue-Lavenders. 44 inches. H. M., A. I. S., 1933; A. M., A. I. S., 1935.\$1.00

MISSOURI NIGHT—(Callis, 1938). A large, rich
dark velvety blue. The flower is large and the
falls flare brilliant orange beard. The branch-
falls flare, brilliant orange beard. The branching and placement good. Really indigo with a
sheen. Grape hyacinth fragrance. Long, profuse
and late bloomer. 30 inches high\$5.00
MONOMOY—(McKee-Gage, 1936). A large, very
Deep Blue Violet with rich, velvety falls semi-
flaring. Deep Blue beard. Hardy and profuse
bloomer. H. M., A. I. S., 1934\$1.00
MOROCCO ROSE—(Loomis, 1937). The flower
is large, almost 5½ inches long. The standards
are a lustrous pale pink, flushed deeper pink
with a soft yellow flush at the base. The falls
are long and semi-flaring of deep Rosolane Pink.
The garden effect is a glowing rich pink. H.
M., 1937\$6.00
MOUNTAIN SNOW—(Kell., 1937). A glistening
white that coming in its faint blueness a many
white that carries, in its faint blueness, a memory of the night just past; a white, touched at
the heart with the nearly nink tone of the con-
the heart with the pearly pink tone of the coming sun. The broad S. are large and ruffled;
the almost horizontal F. are broad both in haft
and blade. The substance is excellent, one bloom
lasting through four days of hot sun. 42 inches.
H. M., A. I. S., 1936
NARAIN—(Shuber, 1936). A distinctive blue
Iris of fine form and silken finish. 38 inches,
\$1.60
NARANJA—(Mitchell, 1935). A large flower of
definite orange tone. S. are bright Empire Yel-
low; F. orange at the haft with yellow markings
in the center. Orange yellow beard. H. M., A.
I. S., 1936; A. M., 1937. 44 inches\$2.00
NATIVIDAD—(M. M., 1932). Warm, creamy
white of perfect substance and form50c
NEOS-(Sturtevant, 1937). An equisite pink and
yellow blend. The standards and falls have a
clear yellow background flushed with pink. The
apricot and yellow heart of the flower is glori-
fied by the intense orange beard. 30 inches,
\$2.00
NO-WE-TA-(H. Sass, 1932). A true pink self
with yellow flushes in the center and on the edges
with yellow husines in the center and on the edges
of standards and falls. A pinker Midgard35c
of standards and falls. A pinker Midgard35c
of standards and falls. A pinker Midgard35c ORMOHR—(Klein, 1937). A William Mohr
of standards and falls. A pinker Midgard35c ORMOHR—(Klein, 1937). A William Mohr hybrid seedling with giant flowers of a uniform
of standards and falls. A pinker Midgard35c ORMOHR—(Klein, 1937). A William Mohr hybrid seedling with giant flowers of a uniform gray-lavender veined violet, having over all, a
of standards and falls. A pinker Midgard35c ORMOHR—(Klein, 1937). A William Mohr hybrid seedling with giant flowers of a uniform gray-lavender veined violet, having over all, a rosy glow\$8.00

of standards and falls. A pinker Midgard35c ORMOHR—(Klein, 1937). A William Mohr hybrid seedling with giant flowers of a uniform gray-lavender veined violet, having over all, a rosy glow
of standards and falls. A pinker Midgard35c ORMOHR—(Klein, 1937). A William Mohr hybrid seedling with giant flowers of a uniform gray-lavender veined violet, having over all, a rosy glow
of standards and falls. A pinker Midgard35c ORMOHR—(Klein, 1937). A William Mohr hybrid seedling with giant flowers of a uniform gray-lavender veined violet, having over all, a rosy glow
of standards and falls. A pinker Midgard35c ORMOHR—(Klein, 1937). A William Mohr hybrid seedling with giant flowers of a uniform gray-lavender veined violet, having over all, a rosy glow
of standards and falls. A pinker Midgard. 35c ORMOHR—(Klein, 1937). A William Mohr hybrid seedling with giant flowers of a uniform gray-lavender veined violet, having over all, a rosy glow
of standards and falls. A pinker Midgard35c ORMOHR—(Klein, 1937). A William Mohr hybrid seedling with giant flowers of a uniform gray-lavender veined violet, having over all, a rosy glow

PRAIRIE ROSE—(Egelberg, 1934). Larger and
better substance than Wild Rose, and pinker
than Rheingauperle. 36 inches
PURPLE GIANT—(Gage, 1933). Enormous dark blue-purple flowers. 32 inches\$1.00
RED BONNET—(Gage, 1939). This is a dark
red self. The flowers are large, of fine form
with wide standards and falls. Standards are
domed, closed, and the falls are flaring. Fair
branching, smooth texture, fairly early and very
fragrant. I had never seen a red iris that will
compare with RED BONNET for purity of its
red color. Probably the reddest iris in commerce today, and invaluable for breeding reds,
its progeny showing variety of tones from crim-
son to near pink. Height 36 inches. H. M., A.
I. S., 1939\$3.50
RED COMET—(McKee-Gage, 1936). A large,
deep coppery red with mahogany undertone.
Fine form and good substance. Semi-flaring
falls and gold beard. Good branching of 40-inch
stalks. H. M., A. I. S., 1935\$3.50
RED GLEAM-(Lapham, 1939). A very brilliant
red Iris with fine, strong, well-branched stalk.
There are nine large blooms of good substance
and resistance. Standards brilliant red, and the
falls are rich red, edged lighter red, with a black-
purple lustre. The falls are flaring and broad.
Standards arched. Yellow style branches.
Height 36 inches; midseason. The above is Mr.
Lapham's description. One judge remarked:
"Here is a red Iris that does not need sunshine to

IRIS SIBIRICA

These dainty and fairy-like Irises are very hardy and bloom in profusion in partial shade or in the sun, but prefer a moist location, and a fairly rich soil. The flowers are of medium size on tall,

graceful stems.

Do not plant Siberian Irises in dry or sloping ground. They like moist, but not too wet soil, and should be planted a little deeper than tall bearded Irises; the crowns ¾ inches below surface, and should be watered occasionally during a dry spell. BLUE CHARM—(Sass, 1931). Large, intense blue; tall darkest and best Siberian; black pansy-purple; tall and late blooming\$1.00

DRAGONFLY—Pale blue standards flushed violet, and rich sky blue falls. 45 inches......25c ENSATA—(Species).
